Hair loss and thinning?

Did you know that the 5 main causes of hair loss are damage to follicles from: Stress, hormonal changes, medications, treatments and genetic conditions. Knowing the root cause of your issues is key. Whatever your hair problem is, we can help you find the best solution and get you back on the road to growth. Ask your stylist for a full analysis and personalised treatment plan.

Extreme damage?

Over processed hair? Overdone it with the heated styling? Feeling the impact of sun and chlorine damage? Our restorative professional treatment products will deeply nourish, and hydrate your locks to restore inner strength and shine to your crowning glory. Healthy glossy locks await!

Sensitive and irritable scalp?

Did you know the skin on your scalp ages faster than your facial skin? As it ages, it loses the ability to hold moisture, which you need for healthy hair growth. If you're experiencing increased sensitivity, dryness or irritation we have a range of bespoke solutions to help refresh and rejuvenate your scalp!

Ask your stylist for a full analysis and your personalised treatment plan.

WELLA PLEX
